Activity #3: Technology configuration inventory

Name: Mahamed Bashir
Community (UN SD goal): #13 climate changes

Date: Feb 1st ,2021

Instructions

It is useful to inventory the current technology configuration of the community, i.e., the current technology that the people working, learning, advancing knowledge (etc.) in the specific area you are engineering software for are using, as a way to understand the community better and what matters to them better. If yours is a new community, it may not have any specific technology yet, but even for brand new communities, the current configuration may not be empty, for instance if general tools like email or phone are going to be used. You can use a version of the table on the next page to inventory and analyze the current configuration of your community:

- 1. Get the big picture. Research the area and make a list of all the platforms and stand-alone tools in your community's configuration as best you can
- 2. For each platform, list the tools and check the ones that are being used. Why are some not being used? Are there duplicates? Are there issues around integration between tools?
- 3. To the left, make a note of which community activities/orientations the tools currently support in your community
- 4. To the right, identify the key features of tools. Are some of these features commonly or rarely used? What are the reasons for that?
- 5. Assess actual tool use if you can. Identify which are dominant and which are only used by smaller groups and individuals.

NOTE: Add new rows as needed below. Please know your search should be as exhaustive as possible given the area you are researching

Stand-alone tool	Tool type or name		
Supported activities	Tool	Key features	Usage notes
Analytics	chart	Chart, show carbon budget	Users can see their carbon usage. This included monthly budget, carbon emissions arb

Stand-alone tool	Tool type or name		
Supported activities	Tool	Key features	Usage notes

Monthly Budget	slider	User can slide back-and	The user sets monthly
		forth to adjust their monthly budget	emission budget (Car, Plane, food, etc.)

Stand-alone tool	Tool type or name		
Supported activities	Tool	Key features	Usage notes
